Starting point/trailhead:	Tambre – central square
Coordinates:	Geogr. 46.129326,12.423072
Loop	

Percorso ad anello che parte dalla Piazza di Tambre. Si snoda in zona lontana dal traffico. Facile ed adatto a famiglie con bambini. Durante l'estate vi si trovano le lumache che danno il nome al sentiero.

The snail doesn't go very far, it moves very slowly without any rush. The Troi del S'cios wants to offer an alternative to the normal road between the two villages of Tambre and Tambruz. Away from the traffic, very easy, brief and ideal for everybody including families with babies and children. Leaving from the small stairs in Tambre and going up for a while following the indications of the S'cios you continue on the left to get to Tambruz on the valley. Crossed the state highway (mind the crossroad) you go down through the old Cal del Leip, walking beside the small church of Tambruz. After a small bridge the Tariòl de la Madoneta will assure your arrival in the old side of Tambre. Along this route during the summer it is easy to meet the snails: for this reason it is called the path of the "s'cios". The journey time is half an hour and the length is just over 1 km the difference in height is 41m.
